GROUNDWATER MONITORING PROGRAM.....1

GROUNDWATER MONITORING PROGRAM

Entergy Arkansas, LLC (Entergy), performed groundwater monitoring around the recycle ponds at the Independence plant during 2019. Following a quarterly sampling schedule in 2019, Entergy collected four of the eight initial independent samples necessary to initiate a detection monitoring program. As of the date of this report, Entergy has collected a total of six samples from each monitoring well. Entergy will continue to collect samples from these monitoring wells on a quarterly basis until eight independent samples are collected from each well. This is anticipated to be completed in the second quarter of 2020. After completing the initial sampling, Entergy will initiate detection monitoring and prepare an annual groundwater monitoring and corrective action report for 2020. This report will be placed in the facility operating record no later than the annual reporting deadline of January 31, 2021, and will be subsequently posted to the associated public website.
