

ENTERGY ARKANSAS, LLC
 AVOIDED CAPACITY AND ENERGY COSTS
 APPLICABLE TO RIDER SCR
 - ARKANSAS -

AVOIDED CAPACITY COSTS:

Capacity - \$0.0 per kW of capacity under a long-term contract subject to approval of the Arkansas Public Service Commission.

AVOIDED ENERGY COSTS:

Voltage Level of Purchase		Summer Period Energy Deliveries		Other Period Energy Deliveries		Annual Average
		On-Peak	Off-Peak	On-Peak	Off-Peak	
Generation -	¢/kWh	3.354	2.938	3.325	3.239	3.232
Transmission ≥230kV -	¢/kWh	3.403	2.967	3.334	3.232	3.250
Transmission <230kV -	¢/kWh	3.439	2.997	3.369	3.265	3.284
Primary -	¢/kWh	3.579	3.120	3.506	3.399	3.418
Secondary -	¢/kWh	3.675	3.203	3.600	3.489	3.509

SEASON/TIME PERIOD DEFINITION:

Summer Period: April 1st – September 30th
On-Peak Hours: 6:00 a.m. - 10:00 p.m., Monday – Saturday
Off-Peak Hours: All hours not designated as on-peak hours

Other Period: October 1st – March 31st
On-Peak Hours: 6:00 a.m. - 10:00 p.m., Monday - Saturday
Off-Peak Hours: All hours not designated as on-peak hours

NOTES:

- (1) The avoided energy costs in this Bulletin were developed to be applicable to total energy of 100 MW per hour.
- (2) The avoided energy costs in this Bulletin are adjusted to reflect the various losses appropriate to the voltage level at which purchases are made.
- (3) This Bulletin is applicable in the EAL load control area only.
- (4) Average annual numbers are shown for informational purposes and may be used for purchases from small qualified facilities if time of use metering is not economical.

Avoided Costs Bulletin No. 86
