52.0. NET-METERING

52.1. DEFINITIONS

52.1.1. Avoided Cost – As defined in A.C.A. 23-18-603(1).

52.1.2. Net Metering – As defined in A.C.A. 23-18-603(6).

52.1.4. Net-Metering Facility – As defined in A.C.A. 23-18-603(8).

52.1.5. Electric Utility – As defined in A.C.A. 23-18-603(3).

52.1.6. Net Excess Generation – As defined in A.C.A. 23-18-603(5).

52.1.7. Renewable Energy Credit – As defined in A.C.A. 23-18-603(10).

52.1.8. Quantifiable Benefits – As defined in A.C.A. 23-18-603(9).

52.2. AVAILABILITY

52.2.1. Service under the provisions of this tariff is available to any residential or any other customer who takes service under standard rate schedule(s) General Purpose Residential Service (RS), Optional Residential Time-Of-Use (RT), Residential Energy Management Time-Of-Use (REM), Small General Service (SGS), Nonresidential General Farm Service (GFS), Agricultural Water Pumping Service (AP) Optional Monthly Rate (B), Large General Service (LGS), Large General Service Time-Of-Use (GST), Large Power Service (LPS) or Large Power Service Time-Of-Use (PST) who is a Net-Metering Customer and who has obtained a signed Standard Interconnection Agreement for Net-Metering Facilities with Entergy Arkansas, LLC ("EAL" or the "Company"). The generating capacity of Net-Metering Facilities may not exceed the greater of: 1) twenty-five kilowatts (25 kW) or 2) one hundred percent (100%) of the Net-Metering Customer's highest monthly usage in the previous twelve (12) months for Residential Use. The generating capacity of Net-Metering...
Facilities may not exceed one thousand kilowatts (1,000 kW) for non-residential use unless otherwise allowed by the Commission. Net-Metering is intended primarily to offset part or all of the customer's energy use.

The provisions of the customer's standard rate schedule are modified as specified herein.

52.2. Net-Metering Customers taking service under the provisions of this tariff may not simultaneously take service under the provisions of any other alternative source generation or co-generation tariff except as provided in the Net-Metering Rules.

52.3. MONTHLY BILLING

52.3.1. The Company shall separately meter, bill, and credit each Net-Metering Facility even if one (1) or more Net-Metering Facilities are under common ownership.

52.3.2. On a monthly basis, the Net-Metering Customer shall be billed the charges applicable under the currently effective standard rate schedule and any appropriate rider schedules. Under Net-Metering, only the kilowatt hour (kWh) units of a Net-Metering Customer's bill are netted.

52.3.3. If the kWhs supplied by the Company exceed the kWhs generated by the Net-Metering Facility and fed back to the Company during the Billing Period, the Net-Metering Customer shall be billed for the net billable kWhs supplied by the Company in accordance with the rates and charges under the Net-Metering Customer’s standard rate schedule.

52.3.4. For Net-Metering Customers who receive service under a rate that does not include a demand component, the Company shall credit a Net-Metering Customer with the amount of any accumulated Net Excess Generation as measured in kWh or kWh multiplied by the applicable retail rate in the next applicable billing period and base the bill of the Net-Metering Customer on the net amount of electricity as measured in kWh or kWh multiplied by the applicable retail rate that the Net Metering Customer has received from or fed back to the Company during the billing period.

52.3.5. For Net-Metering Customers who receive service under a rate that includes a demand component with a generating capacity of 1,000 kW or less, the Company shall credit the Net-Metering Customer with any accumulated Net Excess Generation as measured in kWh in the next applicable billing period and base the bill of the Net-Metering Customer on the net amount of electricity as measured in kWh that the Net-Metering Customer has received from or fed back to the Company during the billing period.

52.3.6. For Net-Metering Customers who receive service under a rate that includes a demand component with a generating capacity over 1,000 kW and up to 20 MW and who receive approval to exceed the statutory limits under A.C.A. 23-18-604(b)(9), the Company shall credit the Net-Metering Customer with the amount of any accumulated Net Excess Generation as measured in kWh in the next applicable billing period and base the bill of
## Title: Net-Metering Service (N-M)

the Net-Metering Customer on the net amount of electricity as measured in kWh that the Net-Metering Customer has received from or fed back to the Company during the billing period.

The Company shall also bill the Net-Metering Customer a grid charge:

| Grid Charge Rate: | $0.00 |

52.3.7. If the kWhs generated by the Net-Metering Facility and fed back to the Company during the Billing Period exceed the kWhs supplied by the Company to the Net-Metering Customer during the applicable Billing Period, the Company shall credit the Net-Metering Customer with any accumulated Net Excess Generation in the next applicable Billing Period.

52.3.8. Net Excess Generation shall first be credited to the Net-Metering Customer’s meter to which the Net-Metering Facility is physically attached (Generation Meter).

52.3.9. After application of 52.3.8. and upon request of the Net-Metering Customer pursuant to 52.3.11., any remaining Net Excess Generation shall be credited to one or more of the Net-Metering Customer’s meters (Additional Meters) in the rank order provided by the Net-Metering Customer.

52.3.10. Net Excess Generation shall be credited as described in 52.3.8. and 52.3.9. during subsequent Billing Periods; the Net Excess Generation credits remaining in a Net-Metering Customer’s account at the close of a billing cycle shall not expire and shall be carried forward to subsequent billing cycles indefinitely. For Net Excess Generation credits older than twenty-four (24) months, a Net-Metering Customer may elect to have the Company purchase the Net Excess Generation Credits in the Net-Metering Customer’s account at the Company’s Avoided Cost plus any additional sum determined under the Net Metering Rules if the sum to be paid to the Net-Metering Customer is at least one hundred dollars ($100). The Company shall purchase at the Company’s Avoided Cost, plus any additional sum determined under the Net Metering Rules any Net Excess Generation Credits remaining in a Net-Metering Customer’s account when the Net-Metering Customer: 1) ceases to be a customer of the Company; 2) ceases to operate the Net-Metering Facility; or 3) transfers the Net-Metering Facility to another person.

When purchasing Net Excess Generation credits from a Net-Metering Customer, the Company shall calculate the payment based on its Avoided Costs plus any additional sum determined under the Net-Metering Rules for the current year.

52.3.11. Upon request from a Net-Metering Customer, the Company must apply Net Excess Generation to the Net-Metering Customer’s Additional Meters provided that:

(a) The Net-Metering Customer must give at least 30 days’ notice to the Company.
(b) The Additional Meter(s) must be identified at the time of the request. Additional Meter(s) shall be under common ownership within the Company’s service area; shall be used to measure the Net-Metering Customer’s requirements for electricity; may be in a different class of service than the Generation Meter; shall be assigned to one, and only one, Generation Meter; shall not be a Generation Meter; and shall not be associated with unmetered service.

However, the common ownership requirement shall not apply if more than two customers that are governmental entities or other entities that are exempt from state and federal income tax defined under 23-18-603(7)(c) co-locate at a site hosting the Net Metering Facility.

(c) In the event that more than one of the Net-Metering Customer’s meters is identified, the Net-Metering Customer must designate the rank order for the Additional Meters to which excess kWh are to be applied. The Net-Metering Customer cannot designate the rank order more than once during the Annual Billing Cycle.

52.3.12. Any Renewable Energy Credit created as the result of electricity supplied by a Net-Metering Customer is the property of the Net-Metering Customer that generated the Renewable Energy Credit.

52.3.13. Grandfathering shall be governed by A.C.A.23-18-604(b)(10).

**II. TERMS AND CONDITIONS**

**Section 1. Requirements for Request**

For the purpose of requesting that the Company conduct a preliminary interconnection site review for a proposed Net-Metering Facility pursuant to the requirement of Rule 2.06.B.4, or as otherwise requested by the customer, the customer shall notify the Company by submitting a completed Preliminary Interconnection Site Review Request. The customer shall submit a separate Preliminary Interconnection Site Review Request for each point of interconnection if information about multiple points of interconnection is requested. Part 1, Standard Information, Sections 1 through 5 of the Preliminary Interconnection Site Review Request must be completed for the notification to be valid. If mailed, the date of notification shall be the third day following the mailing of the Preliminary...
Interconnection Site Review Request. The Company shall provide a copy of the Preliminary Interconnection Site Review Request to the customer upon request.

Section 2. Utility Review
Following submission of the Preliminary Interconnection Site Review Request by the customer, the Company shall review the plans of the facility interconnection and provide the results of its review to the customer, in writing, within 30 calendar days. If the customer requests that multiple interconnection site reviews be conducted the Company shall make reasonable efforts to provide the customer with the results of the review within 30 calendar days. If the Company cannot meet the deadline it will provide the customer with an estimated date by which it will complete the review. Any items that would prevent Parallel Operation due to violation of safety standards and/or power generation limits shall be explained along with a description of the modifications necessary to remedy the violations.

The preliminary interconnection site review is non-binding and need only include existing data and does not require the Company to conduct a study or other analysis of the proposed interconnection site in the event that data is not readily available. The Company shall notify the customer if additional site screening may be required prior to interconnection of the facility. The customer shall be responsible for the actual costs for conducting the preliminary interconnection site review and any subsequent costs associated with site screening that may be required.

Section 3. Application to Exceed 1,000 kW Net-Metering Facility Size Limit
This Preliminary Interconnection Site Review Request and the results of the Company’s review of the facility interconnection shall be filed with the Commission with the customer’s application to exceed the 1,000 kW facility size limit pursuant to Net Metering Rule 2.06.B.4.

Section 4. Standard Interconnection Agreement
The preliminary interconnection site review does not relieve the customer of the requirement to execute a Standard Interconnection Agreement prior to interconnection of the facility.

II. INTERCONNECTION AGREEMENT TERMS AND CONDITIONS

This Interconnection Agreement for Net-Metering Facilities ("Agreement") is made and entered into this ______ day of ________________, 20__, by Entergy Arkansas, LLC ("EAL" or the "Company") and ___________________________ ("Customer"), a __________ (specify whether corporation or other) and ___________________________ ("Owner"), a __________ (specify whether corporation or other), each hereinafter sometimes referred to individually as "Party" or collectively as the "Parties". In consideration of the mutual covenants set forth herein, the Parties agree as follows:

Section 1. The Net-Metering Facility

Section 2. Governing Provisions
The Parties shall be subject to the provisions of Ark. Code Ann. § 23-18-604 and the terms and conditions set forth in this Agreement, the Commission’s Net-Metering Rules, the Commission’s General Service Rules, and the Company’s applicable tariffs.

Section 3. Interruption or Reduction of Deliveries
The Company shall not be obligated to accept and may require Customer to interrupt or reduce deliveries when necessary in order to construct, install, repair, replace, remove, investigate, or inspect any of its equipment or part of its system; or if it reasonably determines that curtailment, interruption, or reduction is necessary because of emergencies, forced outages, force majeure, or compliance with prudent electrical practices. Whenever possible, the Company shall give the Customer reasonable notice of the possibility that interruption or reduction of deliveries may be required. Notwithstanding any other provision of this Agreement, if at any time the Company reasonably determines that either the facility may endanger the Company’s personnel or other persons or property, or the continued operation of the Customer's facility may endanger the integrity or safety of the Company’s electric system, the Company shall have the right to disconnect and lock out the Customer's facility from the Company’s electric system. The Customer's facility shall remain disconnected until such time as the Company is
reasonably satisfied that the conditions referenced in this Section have been corrected.

Section 4. Interconnection
Customer shall deliver the as-available energy to the Company at the Company’s meter.

The Company shall furnish and install a standard kilowatt hour meter. Customer shall provide and install a meter socket for the Company’s meter and any related interconnection equipment per the Company’s technical requirements, including safety and performance standards.

The customer shall submit a Standard Interconnection Agreement to the Company at least thirty (30) days prior to the date the customer intends to interconnect the Net-Metering Facilities to the Company’s facilities. Part I, Standard Information, Sections 1 through 6 of the Standard Interconnection Agreement must be completed to be valid. The customer shall have all equipment necessary to complete the interconnection prior to such notification. If mailed, the date of notification shall be the third day following the mailing of the Standard Interconnection Agreement. The Company shall provide a copy of the Standard Interconnection Agreement to the customer upon request.

Following submission of the Standard Interconnection Agreement by the customer, the Company shall review the plans of the facility and provide the results of its review to the customer, in writing, within 30 calendar days. Any items that would prevent Parallel Operation due to violation of applicable safety standards and/or power generation limits shall be explained along with a description of the modifications necessary to remedy the violations.

If the Company’s existing facilities are not adequate to interconnect with the Net-Metering Facility, the Customer shall pay the cost of additional or reconfigured facilities prior to the installation or reconfiguration of the facilities.

To prevent a Net-Metering Customer from back-feeding a de-energized line, the customer shall install a manual disconnect switch with lockout capability that is accessible to utility personnel at all hours. This requirement for a manual disconnect switch will be waived if the following three conditions are met: 1) The
inverter equipment must be designed to shut down or disconnect and cannot be manually overridden by the customer upon loss of utility service; 2) The inverter must be warranted by the manufacturer to shut down or disconnect upon loss of utility service; and 3) The inverter must be properly installed and operated, and inspected and/or tested by utility personnel.

Customer, at customer’s expense, shall meet all safety and performance standards established by local and national electrical codes including the National Electrical Code (NEC), the Institute of Electrical and Electronics Engineers (IEEE), the National Electrical Safety Code (NESC), and Underwriters Laboratories (UL).

Customer, at customer’s expense, shall meet all safety and performance standards adopted by the Company and filed with and approved by the Commission that are necessary to assure safe and reliable operation of the Net Metering Facility to the utility’s system.

Customer shall not commence Parallel Operation of the Net-Metering Facility until the Net-Metering Facility has been inspected and approved by the Company. Such approval shall not be unreasonably withheld or delayed. Notwithstanding the foregoing, the Company’s approval to operate the Customer’s Net-Metering Facility in parallel with the Company’s electrical system should not be construed as an endorsement, confirmation, warranty, guarantee, or representation concerning the safety, operating characteristics, durability, or reliability of the Customer’s Net-Metering Facility.

Section 5. Modifications or Changes to the Net-Metering Facility Described in Part 1, Section 2

Prior to being made, the Customer shall notify the Company of, and the Company shall evaluate, any modifications or changes to the Net-Metering Facility described in Part 1, Standard Information, Section 2 of the Standard Interconnection Agreement for Net-Metering Facilities. The notice provided by the Customer shall provide detailed information describing the modifications or changes to the Company in writing, including a revised Standard Interconnection Agreement for Net-Metering Facilities that clearly identifies the changes to be made. The Company shall review the proposed changes to the facility and provide the results of its evaluation to the Customer, in writing, within thirty (30)
calendar days of receipt of the Customer's proposal. Any items that would prevent Parallel Operation due to violation of applicable safety standards and/or power generation limits shall be explained along with a description of the modifications necessary to remedy the violations.

If the Customer makes such modification without the Company’s prior written authorization and the execution of a new Standard Interconnection Agreement, the Company shall have the right to suspend Net-Metering service pursuant to the procedures in Section 6 of the Commission’s General Service Rules.

A Net-Metering Facility shall not be modified or changed to generate electrical energy in excess of the amount necessary to offset all of the Net-Metering Customer requirements for electricity.

**Section 6. Maintenance and Permits**
The customer shall obtain any governmental authorizations and permits required for the construction and operation of the Net-Metering Facility and interconnection facilities. The Customer shall maintain the Net-Metering Facility and interconnection facilities in a safe and reliable manner and in conformance with all applicable laws and regulations.

**Section 7. Access to Premises**
The Company may enter the Customer's premises to inspect the Customer's protective devices and read or test the meter. The Company may disconnect the interconnection facilities without notice if the Company reasonably believes a hazardous condition exists and such immediate action is necessary to protect persons, or the Company’s facilities, or property of others from damage or interference caused by the Customer's facilities, or lack of properly operating protective devices.

**Section 8. Indemnity and Liability**
The following is Applicable to Agreements between the Company and to all Customers and Owners except the State of Arkansas and any entities thereof, local governments and federal agencies:

Each Party shall indemnify the other Party, its directors, officers, agents, and employees against all loss, damages, expense and liability to third persons for injury to or death of persons or injury to property caused by the indemnifying
party’s engineering, design, construction, ownership, maintenance or operations of, or the making of replacements, additions or betterment to, or by failure of, any of such Party’s works or facilities used in connection with this Agreement by reason of omission or negligence, whether active or passive. The indemnifying Party shall, on the other Party’s request, defend any suit asserting a claim covered by this indemnity. The indemnifying Party shall pay all costs that may be incurred by the other Party in enforcing this indemnity. It is the intent of the Parties hereto that, where negligence is determined to be contributory, principles of comparative negligence will be followed and each Party shall bear the proportionate cost of any loss, damage, expense and liability attributable to that Party’s negligence. Nothing in this paragraph shall be applicable to the Parties in any agreement entered into with the State of Arkansas or any entities thereof, or with local governmental entities or federal agencies. Furthermore, nothing in this Agreement shall be construed to waive the sovereign immunity of the State of Arkansas or any entities thereof. The Arkansas State Claims Commission has exclusive jurisdiction over claims against the state.

Nothing in this Agreement shall be construed to create any duty to, any standard of care with reference to or any liability to any person not a Party to this Agreement. Neither the Company, its officers, agents or employees shall be liable for any claims, demands, costs, losses, causes of action, or any other liability of any nature or kind, arising out of the engineering, design, construction, ownership, maintenance or operation of, or the making of replacements, additions or betterment to, or by failure of, the Customer’s facilities by the Customer or any other person or entity.

Section 9. Notices
The Net-Metering Customer shall notify the Company of any changes in the information provided herein.

All written notices shall be directed as follows:

**Section 10. Term of Agreement**

The term of this Agreement shall be the same as the term of the otherwise applicable standard rate schedule. This Agreement shall remain in effect until modified or terminated in accordance with its terms or applicable regulations or laws.

**Section 11. Assignment**

This Agreement and all provisions hereof shall inure to and be binding upon the respective Parties hereto, their personal representatives, heirs, successors, and assigns. The Customer and/or Owner shall not assign this Agreement or any part hereof without the prior written consent of the Company, and such unauthorized assignment may result in termination of this Agreement.

**Section 12. Net-Metering Customer and Owner Certification**

I hereby certify that all of the information provided in this Agreement is true and correct, to the best of my knowledge, and that I have read and understand the Terms and Conditions of this Agreement.

STANDARD INTERCONNECTION AGREEMENT FOR NET-METERING FACILITIES

Disclaimer
POSSIBLE FUTURE RULES OR RATE CHANGES, OR BOTH AFFECTING YOUR NET-METERING FACILITY

The following is a supplement to the Interconnection Agreement you signed with Entergy Arkansas, LLC (“EAL” or the “Company”).

1. Electricity rates, basic charges, and service fees, set by the Company and approved by the Arkansas Public Service Commission (Commission), are subject to change.

2. I understand that I will be responsible for paying any future increases to my electricity rates, basic charges, or service fees from the Company.

3. My Net-Metering System is subject to the current rates of the Company, and the rules and regulations of the Commission. The Company may change its rates in the future with approval of the Commission or the Commission may alter its rules and regulations, or both may happen. If either or both occurs, my system will be subject to those changes.

By signing below, you acknowledge that you have read and understand the above disclaimer.
