

## 2024 EAL EREC RFP

Q1:

For the 2024 Request for Proposals for Energy and Capacity from Existing Generation Resources, does the resource have to have a MISO LGIA and be in operation? Can an asset which is not in operation and in the MISO queue in DPP phase 2 eligible for this RFP? If not, will you have another RFP for assets in the MISO queue without a LGIA in the near future?

A1:

Pursuant to Section 2.5 of the RFP, the proposed resource must have in effect a GIA with MISO and the host utility that supports the proposal. As for upcoming RFPs, please monitor the Arkansas public site [Request for Energy and Capacity Proposals \(entergy-arkansas.com\)](https://www.entergy-arkansas.com) for future RFP opportunities.
